Company brief introduction

About us / Who we are

Shenzhen Yoshine Lighting is among the industry's leading designers and suppliers of energy-efficient lighting systems for commercial, architectural, educational and residential applications. Founded in 2008. Over last 10 years. Yoshine products have become benchmarks for innovation, quality and new energy-efficiency standards. With great capacity of technological innovation. Research and development. Experience. The company has gradually modified its products range. Focus its business on façade. architectural and landscape lighting for indoor and outdoor areas. these products are developed for domestic use as well as export to many countries in North and south America. Europe . Middle east and Asia Pacific. Yoshine product range offers customers a wide choice of standard as well as bespoke luminaires for their specific lighting needs.

What we do

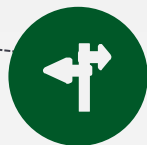

Production

One of the pioneer in world' s leading manufacturers in the architectural lighting market. Featuring a comprehensive catalog of proven quality. High realiability and fully waterproof lighting fixtures.

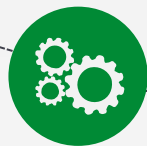

Design

Design with creative illumination to the building is what façade lighting. The movemen and building in the architectural skin of the building are accentuated through a layering of the façade lighting.

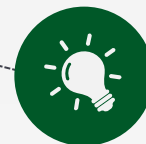

Installation

Our engineering and installation team is well equipped with state of the art machinery. Enabling our workforce to carry out our tasks with highest precision. Our years of experience in civil and engineering field help us achieve this.

Supply

Our supply team ensures that the right products are made available in right quantity. At right place. In right time. Ready for immediate use and ideal for façade lighting application

Maintenance

By renovating your lighting technology. You save energy and thus. Money. When your lamps are upgrated or retrofitted at the same time. It is a good idea to plan on a group relamp. For façade lighting maintenance no look further than us.

Creative illumination

We offer creative external illumination in and around your facility. In such a way to create enchanting ambiance. Designing in sync with on trend technology and keeping in mind the cause of lighting as well as locale.

Our Advantages

Innovation

With keep an eye on industrial news. Product s. And collect the comments from our customers to improve and develop our new items. Most of our projects are specifically customized. Usually develop 3-5 new items per quarter.

Design

With a complete design teams from structure design. Electronic and circuit design. Solution design. And make the project effect according customer ideas.

Flexibility

No matter big or small project. Which all can enjoy our quality service. And we prepare a lot raw material to handle the urgent orders.

Professionalism

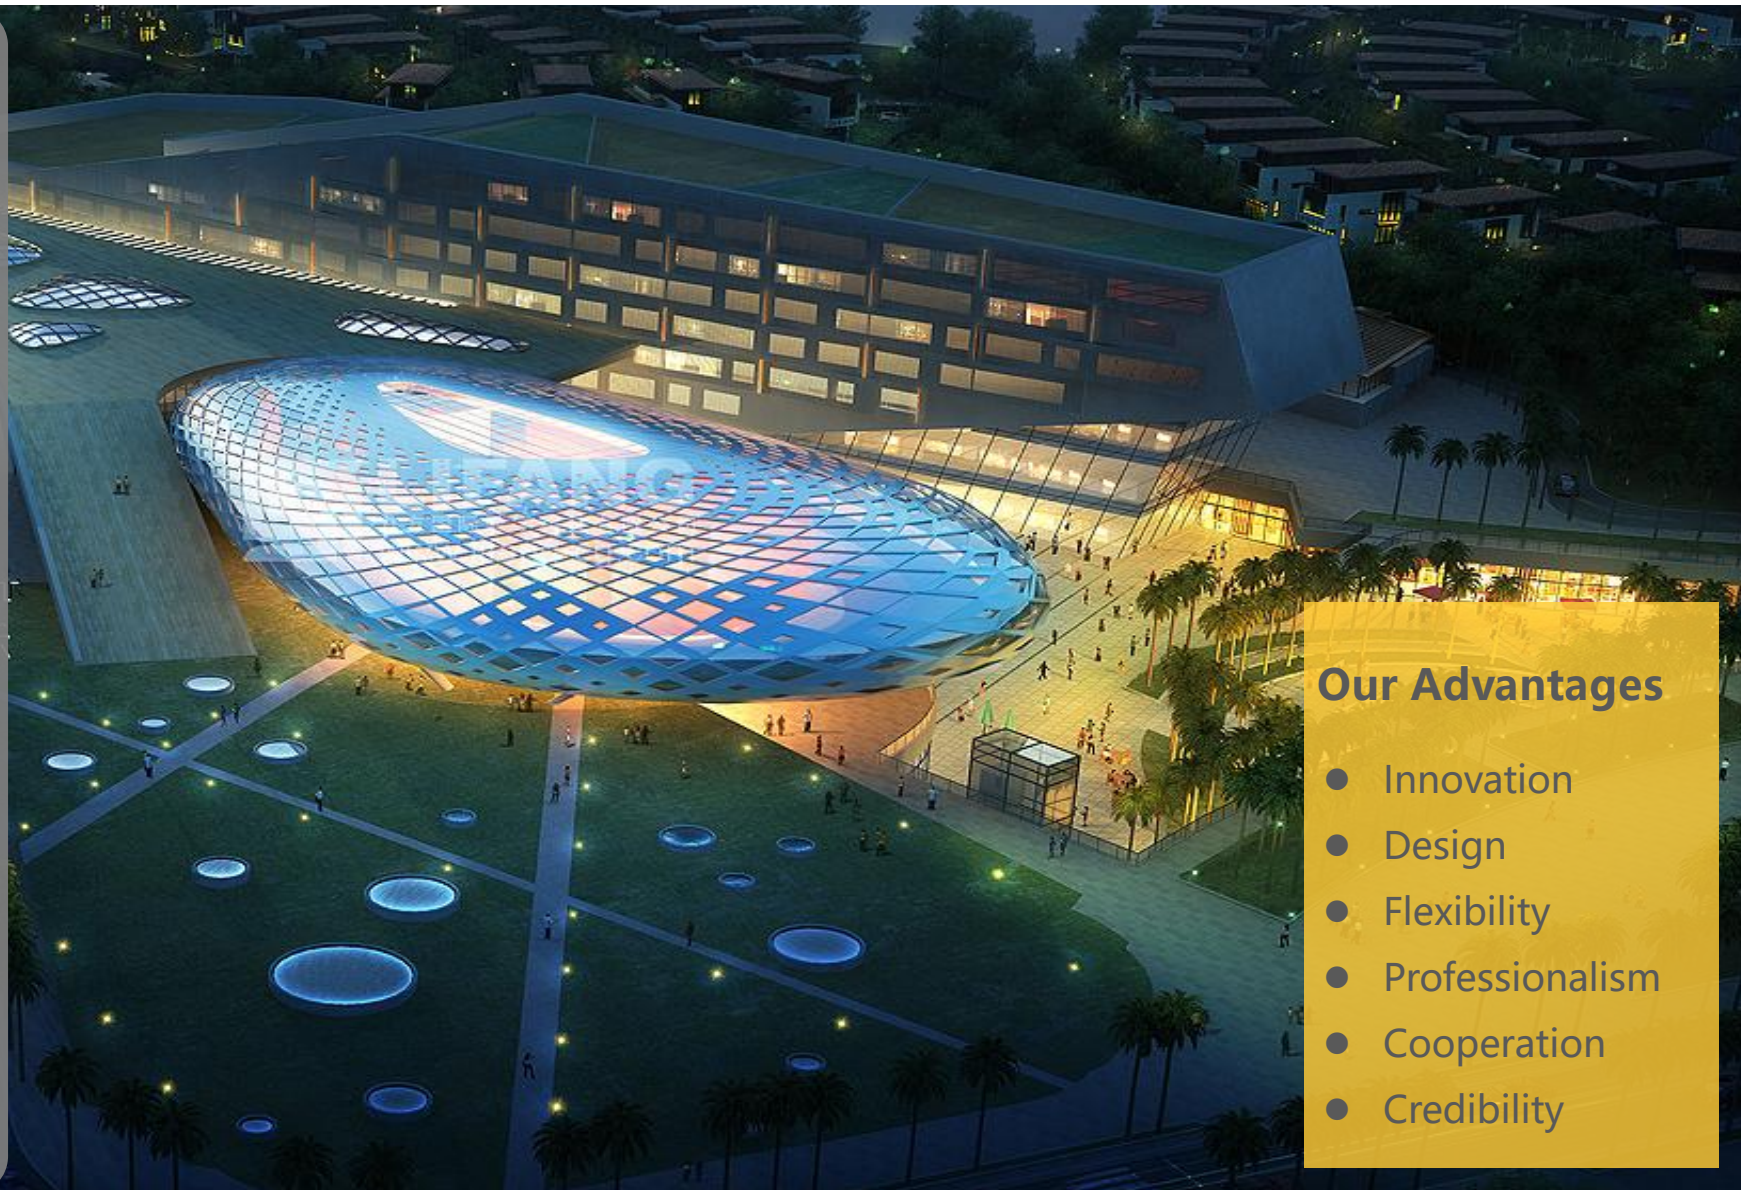

There is an professional team of our company. From design. Product recommend. Commissioning process. Installation . these all can get our fully support.

Cooperation

No matter where you are. No matter big or small. No matter contractor. architect. distributor you are. We warmly welcome you!

Credibility

We keep strictly promise on quality. Quantity. Delivery time. After-sales service.

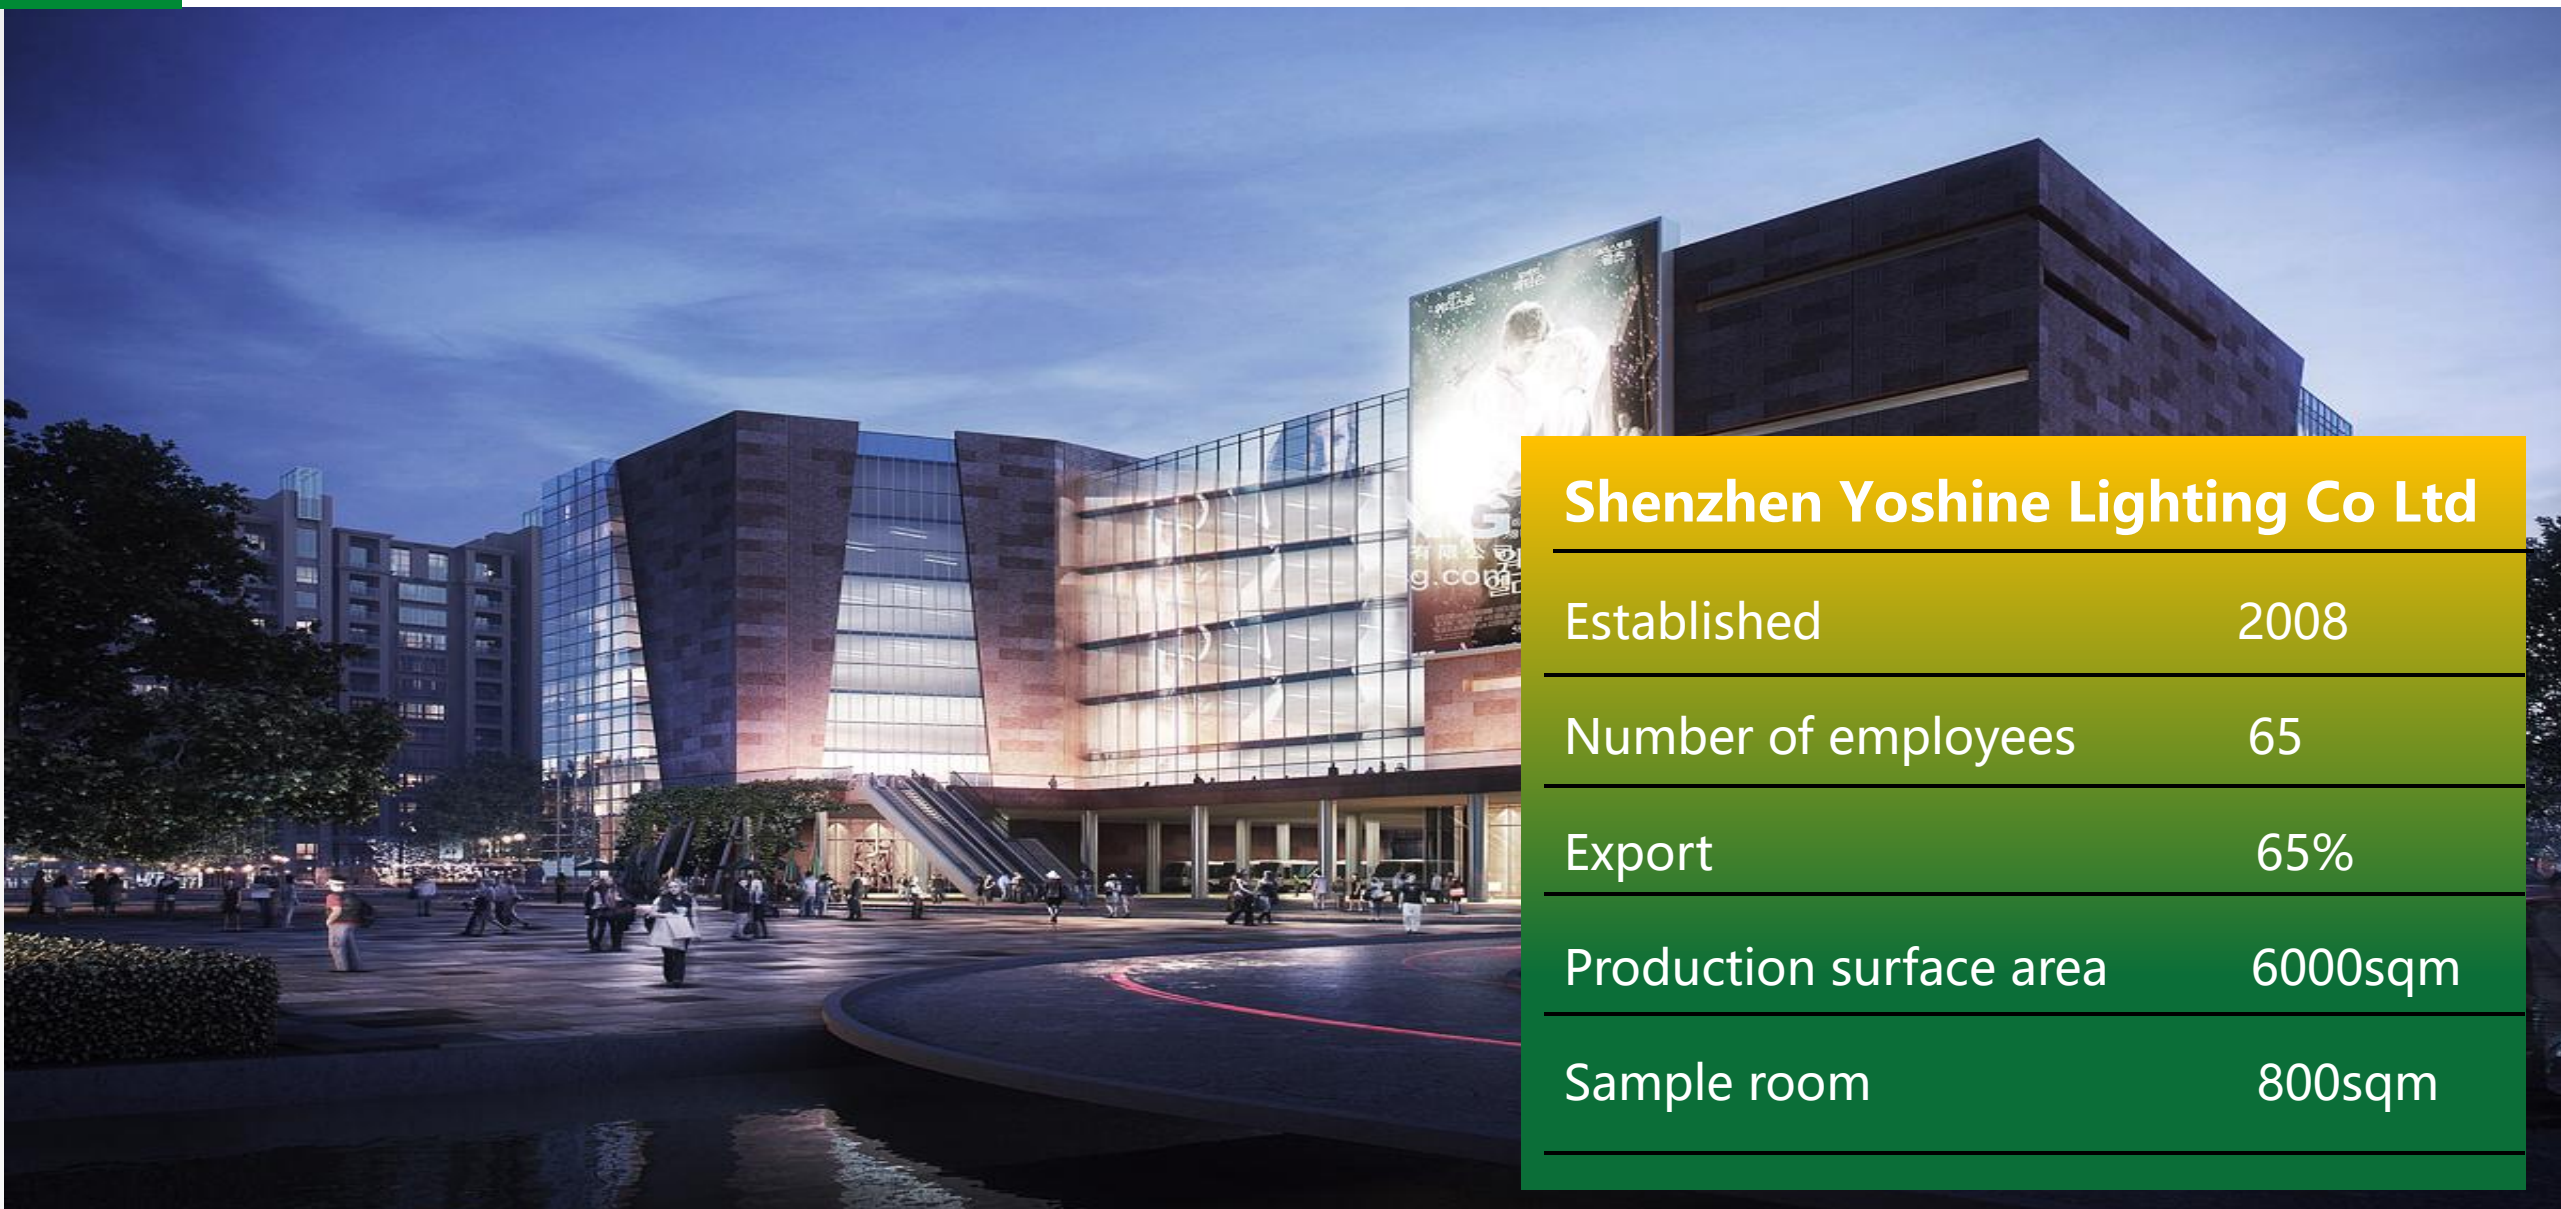

Our Advantages

- Innovation
- Design
- Flexibility
- Professionalism
- Cooperation
- Credibility

Our Advantages

Shenzhen Yoshine Lighting Co Ltd

Established	2008
Number of employees	65
Export	65%
Production surface area	6000sqm
Sample room	800sqm

Manufacture

- **Technologies**

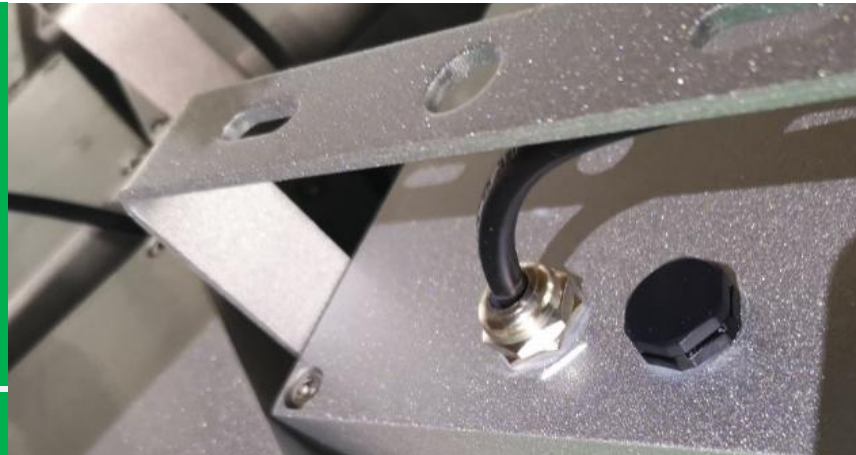

We invest in continual technological development. From software to hardware. To ensure stable quality during production.

- **Special request**

Our factory provided us with unrivalled flexibility. Which allow us to make very small and precise parts with ease and at speed.

- **LED production**

All of our LED chips are soldered using the selective wave method, all components and final products are thoroughly tested using precision equipment in line with stringent ISO 9001. LM80. Technical standard.

In House Research and development

● Industrial design

All the pre-production processes that lead to a fully functional prototype.

● Optical design

Selection and refinement of appropriate optical parts using vast practical experience and theoretical knowledge.

● Thermal design

Characterisation of every product to ensure the reliability of every product and R&D of innovative concepts

● Electronic design

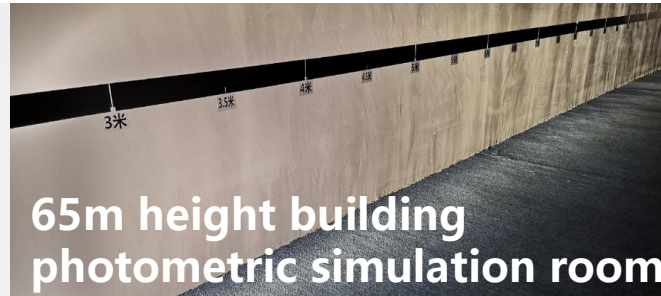

Advanced system level design. Long term performance tests performed in-house.

● Mechanical design

More than 10 years of experience in the mechanical design and customization of luminaires and precision tools.

● Lab service

Optical. Thermal. Electronic. Mechanical and pre-certification tests and measurements.

65m height building photometric simulation room

Full luminaire development

One of the best-equipped and staffed R&D department. Head engineer from Philips with more than 10 years experience. Delivering seamless industrial, optical, thermal, electronic, and mechanical design and custom product development.
